Open Discussion

I workshop of the Herbert Simon Society

September 10th, 2012

Fondazione Bruno Kessler
Via Sommarive 18 | 38123 | Trento
Sala Stringa

Topic and themes

The Herbert A. Simon Society brings together some of the most important economists critical of contemporary economic models and aims at reformulating economic theory by starting with the many non-neoclassical directions that have been developed in recent years.

This workshop is focused on three themes that were identified as particularly relevant in order to apply Simon's ideas in the contemporary debate: duality of mind, creativity, critics and alternative paradigms to rational expectations.

Registration

Participation is free and welcome.

Registration before September 2th at the following link is mandatory:
<http://fbk.eu/en/simonsociety>

Contribution

Participants can signal their interest in contributing to the discussion and will be included in the final version of the program.

Contact point: marco.novarese@jp.unipmn.it.
