

## Presentation of the Elgar's book

# ARTIFICIAL INTELLIGENCE AND FINANCIAL BEHAVIOUR

(edited by R.Viale, S. Mousavi, U. Filotto and B. Alemanni 2023)

The 21st of December 2023

h. 4:00 - 7:00 p.m.

**CENTAI - Corso Inghilterra, 3 - Torino** 

## **HERBERT SIMON SOCIETY and CENTAL**

## Workshop in presence

R.S.V.P. secretary@herbertsimonsociety.org

To access the conference room on the 30th floor of the skyscraper it is mandatory to register in advance and present an ID at the reception

Riccardo Viale Shabnam Mousavi Umberto Filotto

#### ARTIFICIAL INTELLIGENCE AND FINANCIAL BEHAVIOUR

### **Programme**

h 4:00 p.m *Welcome* Gian Maria Gros Pietro (Intesa Sanpaolo)

h 4:10 p.m. *Introduction* Riccardo Viale (Herbert Simon Society and Università di Milano Bicocca)

h. 4:30 p.m. *Chair* Massimo Egidi (*Herbert Simon Society and LUISS*)

### Interventions:

Barbara Alemanni (Università di Genova)
Umberto Filotto (Università Tor Vergata, Roma)
Remo Pareschi (Università degli Studi del Molise)
Alessandro Varaldo (Banca Aletti)
Filippo Donati (Università di Firenze)
Alessio Botta (McKinsey)

h. 6.00 p.m *Conclusions* Hersh Shefrin *(Santa Clara and Herbert Simon Society)* Mario Rasetti *(CENTAI, Torino)* 

h. 7:00 p.m. *Drink* 

Following rapid technological advancements that have taken place throughout the late twentieth and early twenty-first centuries, this intriguing book provides a dynamic agenda for the study of artificial intelligence (AI) within finance. Through an in-depth consideration of the use of AI, it utilizes case study examples to investigate AI's effectiveness within investment and banking.

Artificial Intelligence and Financial Behaviour examines to what extent AI can guide people to improve their financial wellbeing. It explores potential effects of, and problems with, specific technologies, as well as describing current regulatory considerations regarding the use of AI and machine learning. Chapters succinctly portray the impact AI may have on investor and trader behaviour.

This highly informative book will be beneficial for students and researchers studying behavioural and regulatory economics. It will also be immensely useful for financial regulators who are analysing problems from contemporary points of view.

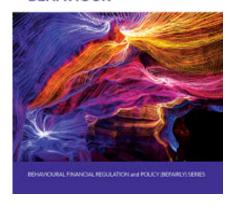

## The workshop is in presence. Those who cannot attend can connect online.

### ARTIFICIAL INTELLIGENCE AND FINANCIAL BEHAVIOUR

### **Contents:**

### Preface viii

Introduction: Artificial intelligence should meet natural

stupidity. But it cannot! 1

Riccardo Viale

### PART I AI AND BOUNDED RATIONALITY

1 Financial service providers, AI, satisficing, and the human touch in the market for financial nudges and boosts 30 Hersh Shefrin

2 The importance of structural rationality: understanding market institutions 51

Shyam Sunder

3 Bits of individual knowledge in bytes of machines 69

Shabnam Mousavi and Mario Rasetti

4 Radical rationality allows coping with fundamental uncertainty on financial markets 89

Paolo Sironi

5 Integrating heuristics and learning in a computational architecture for cognitive trading 111

Remo Pareschi and Federico Zappone

### PART II AI AND MARKETS

6 Artificial intelligence and conduct in wholesale markets 137 Mark Yallop

7 Using AI to assess credit risk; developing a model 144 Umberto Filotto, Tommaso Giordani, Gian Paolo Stella and Filmon Teclai

8 Do we like robot? Consumers' attitude towards the algorithm 156 Barbara Alemanni

9 Financial consumers, digital interfaces and decision aids 174

Peter D. Lunn

10 FOMO and Covid and Cryptos, oh my! 192

Steven Jon Kaplan

11 How AI is re-shaping the financial industry: lights, shades and perspectives 205

Paola Papanicolaou

12 54,000 PRIIPs KIDs – how to read them (all) 215

Adrien Amzallag

13 Machine learning and artificial intelligence for risk management 240

Edoardo Faletti
